Adi Hadiansyah

BACKEND ENGINEER | JAVA & SPRING BOOT

Bandung, Indonesia | adi.hdns@gmail.com

linkedin.com/in/adihdns

PROFESSIONAL SUMMARY

Backend Engineer with 4+ years of experience building and maintaining enterprise applications with Java and Spring Boot. Experienced in RESTful APIs, PostgreSQL, Kafka, SQL optimization, legacy refactoring, and production troubleshooting. Works across requirement analysis, implementation, testing, deployment support, and post-release support, with a focus on reliability, maintainability, and performance.

PROFESSIONAL EXPERIENCE

Backend Developer | PT. Intersolusi Teknologi Asia (BTS.id)

Bandung, Indonesia | Nov 2021 - Jul 2026

- Developed and maintained Java, Spring Boot, and PostgreSQL RESTful services for enterprise operational and financial applications.
- Built capabilities for vehicle and patrol operations, asset lifecycle management, financial journaling, purchasing pre-order workflows, and direct payment processing.
- Optimized SQL queries and backend processing; refactored legacy code and introduced reusable utilities while preserving existing business flows.
- Implemented Kafka-based synchronization and inter-service communication, and Server-Sent Events (SSE) for real-time frontend updates.
- Performed functional smoke testing and mock-based unit testing; investigated service, integration, and data issues in production.
- Translated business and frontend requirements into APIs, validation rules, and data flows. Collaborated with QA, frontend developers, business analysts, and users throughout Agile/Scrum delivery and post-release support.

UI/UX Designer | PT. Digital Amore Kriyanesia

Bandung, Indonesia | Jul 2021 - Oct 2021

Earlier experience: requirements gathering, user research, usability testing, design iteration, and stakeholder presentations with cross-functional teams.

TECHNICAL SKILLS

Backend: Java, Spring Boot, RESTful APIs, backend architecture, reusable service design, legacy code refactoring

Data & performance: PostgreSQL, SQL, relational database design, query optimization, backend performance tuning

Integration: Apache Kafka, event-driven integration, Server-Sent Events (SSE)

Testing & reliability: Functional smoke testing, mock-based unit testing, debugging, production troubleshooting

Delivery: Git, Agile/Scrum, requirement analysis, cross-functional collaboration, deployment support

AI-assisted engineering: Code analysis, debugging, documentation, technical research, solution prototyping

EDUCATION

Widyatama University | Bachelor of Computer Science | Sep 2016 - Nov 2020

SMK Kartika XIX-1 Bandung | Network Engineering | Aug 2013 - Jun 2016
